Listing of Claims

Claims 1-5, inclusive. (CANCELLED WITHOUT PREJUDICE)

Claim 6. (PREVIOUSLY PRESENTED) A deployable-crane building method for use in fabricating a site-built, plural-story building comprising

providing a column-and-beam structural building frame having elongate, nodally interconnected, upright columns and generally horizontal beams,

providing in at least one of these columns, substantially immediately above a nodal connection between this at least one column and a horizontally extending beam, an open, upwardly facing end,

removeably seating the base of a load-handling crane within the mentioned open column end, and

utilizing the frame of nodally interconnected columns and beams, including the mentioned nodal connection which exists between the at least one column and the mentioned horizontally extending beam, furnishing direct load-bearing support for any such base-seated crane, with seating of a crane base in such an open column end furnishing the totality of lateral stabilization and support for the seated crane.
